

“

A wrong career choice can be quite painful, destructive and useless.

How can you deal with
Career Issues of Children?

PathFinder

Research has shown that 80% of students in India are confused when choosing a career. Is your child one of them?

PathFinder, Educafé's scientifically-developed, proprietary assessment tool helps your child to resolve the confusion of choosing the right career path.

Every wise career decision is a mix of a person's abilities, personality traits and interests.

With PathFinder, we provide an effective assessment of your child's cognitive and non-cognitive dimensions, to generate a detailed career report.

In our report, we give your child's psychological profile – personality, work values and aspirations. We then show the 'fitment' for the careers that they have chosen and the educational path that they must follow. In addition, we provide best-fit career clusters.

We also offer counselling sessions to set your child on the right path.

PATHFINDER BENEFITS

We explain your child's strengths and weaknesses, and we match them with the best career based on those.

We sharpen your child's focus as they prepare for life beyond school / college.

Talking to a trained counsellor helps in clarifying doubts and getting up-to-date information and guidance regarding any career related issue and new career possibilities.

Understanding strengths is to "know yourself" better and Educafé helps your child to do this, in a scientific manner through our proprietary "Pathfinder" Assessment.
